Access Products Inc.  
[www.accessproducts.com](http://www.accessproducts.com)

# Introducing the ultimate solution™ in detectable warning systems.

With 20 years of leading research insights and progressive product development experience, Access Products Inc. has combined proven polymer processing and material technologies with innovative and intelligent design features to create the ultimate in detectable warning tiles.

Maximized efficiencies in manufacturing, materials sourcing and product specifications deliver the most cost-effective solution in the industry.

the power of intelligent design  
and precision engineering™

# intelligent design™

the genesis of 20 years of innovation

DETAIL C

Tamper-proof counter-sunk, stainless steel fastener sets flush with tile surface and provides for future replaceability.

High density diamond grip™ pyramid micro texture designed for exceptional slip resistance in wet and dry conditions.

DETAIL D

Nylon composite, corrosion resistant anchor and stainless steel fastener provide unlimited installation due to self-threading design.

Tile geometry allows for consistent dome spacing to be maintained between adjoining Cast in Place Replaceable and Surface Applied tiles.

Hexagonal molded forms for permanent interface between tile and anchor system. Fastener/anchor system comes pre-assembled.

Strategically placed reinforcing internal ribs determined by Finite Element Analysis (FEA) generates enhanced stiffness and structural support.

SURFACE APPLIED TILE

Pre-formed fastener locations enable error-free installation. Color-matched Tek™ Anchor with stainless steel fastener is supplied with tile.

Reinforced top and bottom flange determined by Finite Element Analysis (FEA) generates enhanced stiffness and structural support.

SURFACE APPLIED TILE

Perimeter of tile is bevelled to meet ADA requirements for surface height transition.

Open end design eliminates air entrapment during installation to ensure full interface with concrete substructure.

# proven performance

the rigor of unparalleled testing procedures

Accelerated Aging, Freeze-Thaw Chamber

Extreme heat and freezing cycles test structural integrity in all climates while integral loading cylinders stress tile throughout temperature cycles to validate durability.

Tensile Strength: ASTM D 638

Engineering analysis calculates required strengths when exposed to externally applied forces such as foot traffic and moving vehicles.

Taber Abrasion: ASTM C501

Measures the wear resistance of tile to ensure years of maintenance-free service.

Gardner Abrasion: ASTM D 2486

Additional wear test standard to ensure durability in high foot traffic areas.

Compressive Strength: ASTM D 695

Measures compressive strength to meet ASHRAE standards developed to determine resistance of vehicular loading.

Slip Resistance: ASTM C1028

Measures slip resistance to meet ADA and OHSA standards in both wet and dry conditions.

Flexural Strength: ASTM D 695

Measures flexural properties of material required to analyze the strength necessary to resist repetitive applied forces.

# Access Tile®

Access Tile is designed, tested, and manufactured in the U.S.A.

## Engineered for Performance. Designed for the Environment.

Our product has been designed and developed with the Earth in mind. The ingenuity of its unique features and the power of its simple installation means less harm to the environment.

- recyclable and replaceable material
- lighter weight tile construction reduces impact of shipping
- high efficiency manufacturing operation requires reduced energy consumption
- no concrete demolition necessary for replacements significantly reducing harmful emissions
- highest industry durability extends product life and reduces the number of future replacements

As a member of the U.S. Green Building Council, we take responsibility for developing products that help our customers work towards LEEDS certification.

## YOUR ANSWER TO ACCESSIBILITY STANDARDS

Access Tile is the result of responding to a market demand for a better solution to detectable warning tiles at a cost-effective price. With over 20 years of proven manufacturing experience in detectable warnings, Access Tile's improved design features will exceed industry expectations from specifier to installer.

## ADA, ADAAG, USDOT, FHWA, CALTRANS TITLE 24 COMPLIANT

Complies with Federal and State requirements

- ADA [www.access-board.gov](http://www.access-board.gov)
- ADAAG [www.fhwa.dot.gov](http://www.fhwa.dot.gov)
- CALTRANS compliant per a88a specification  
[www.dot.ca.gov/hq/oppd/access/access.htm](http://www.dot.ca.gov/hq/oppd/access/access.htm)
- USDOT [www.dot.gov](http://www.dot.gov)
- FHWA [www.fhwa.dot.gov](http://www.fhwa.dot.gov)

For full industry standards visit: [www.accesstile.com/standards](http://www.accesstile.com/standards)

## THE NEW INDUSTRY STANDARD

Intelligently designed and precision engineered products that surpass industry and regulated standards in all areas:

- Durability and all-weather resilience
- Structural integrity and UV stability
- Slip resistance
- Cost-effective installation and maintenance
- Speed and ease of installation and replacement

Proud members of:

New innovations from Access Products:

0.10"

**DETAIL B**

Installs in minutes during concrete finishing stage. Preferred by professional contractors who demand quality installations every time.

*Engineered for ultimate performance and optimal cost-effectiveness.*

Wide-in-line dome configuration facilitates a smooth rolling transition for strollers, wheelchairs and walkers meeting federal and state standards.

High density, diamond grip™ pyramid micro texture designed for exceptional slip resistance in wet and dry conditions.

**Access Tile®**

# intelligent design™ cast in place replaceable the ultimate in tactile design

Twenty years of tactile design, testing and manufacturing insights have gone into Access Tile's superior engineered detectable warning product. Access Tile boasts the easiest and fastest installation in the industry requiring no concrete demolition and needing only a single fastening device. The replaceability feature of the tile is industry leading due to its simplicity and speed.

## ADA COMPLIANCE

[www.accesstile.com/ada-compliance](http://www.accesstile.com/ada-compliance)

- 2.35" center-to-center, in-line dome spacing meets ADA Federal and State requirements
- Truncated dome size and spacing compliant with ADA Federal and State requirements, 0.9" base and 0.45" top diameter
- Fully complies with all ADA and DHSA requirements for surface height transitions to eliminate trip hazards
- Consistent dome spacing when tiles are adjoined [side-by-side or end-to-end]
- Wide in-line dome configuration facilitates a smooth rolling transition for strollers, wheelchairs and walkers

## ASTM & UL TESTING

## INTELLIGENT DESIGN FEATURES

- Installs in minutes during concrete finishing stage
- The replaceability feature of the tile is industry leading due to its simplicity and speed
- Tamper-proof, stainless steel fastener maintains flush interface with walking surface
- Corrosion resistant hexagonal anchors designed to entrap concrete for optimal anchoring
- Anchor and fastener material compositions allow for reliable and secure installations when multiple replacements are necessary
- Large interface between tile and anchor seat area maximizes support at each fastener location
- Multiple fastener locations to ensure full anchoring of tactile surface
- Integral structural spine ensures stiffness and strength
- Tiles shipped with removable protective plastic film to provide a clean surface after installation
- Interactive sizes - all tiles maintain pattern repeat when mounted side-to-side or top-to-bottom

# intelligent design™ cast in place replaceable ADA compliant dome geometry

easy to install, easy to replace  
designed for more environmentally-conscious  
installation and replacement

# INSTALLATION

- 1 Maintaining a 4-7 slump range pour and float the concrete.
- 2 Without removing any concrete, place the tile on the curb ramp 6-8" from the curb face/curb.
- 3 Lay the tile in grid pattern across the top face, embedding the tile into the concrete using a non-marring rubber mallet.
- 4 Create an  $\frac{1}{4}$ " concrete free edge around the perimeter of the tile using a 10" radius edging tool then float the concrete around the tile's perimeter using a straightedge.
- 5 Apply a broom-finish to the curb ramp.
- 6 After the concrete has substantially cured, remove the protective plastic wrap by cutting the plastic with a sharp knife (tight to the concrete/tile interface).

# REPLACEMENT

- A Unscrew 127 tamper-proof fasteners.
- B Tap perimeter of tile with a rubber mallet to remove bond of tile to concrete.
- C Use a pry bar to pry up edge. Remove all debris from vacant cavity hole. Vacuum/sweep all crevices.
- D Insert replacement tile, gently apply pressure to seat tile in recess. Reinsert tamper-proof fasteners in hex shape concrete anchors.

## Federal

The Americans with Disabilities Act (ADA) recognizes and protects the civil rights of people with disabilities. To ensure that buildings and facilities are accessible to and usable by people with disabilities, the ADA establishes accessibility requirements. One of those requirements is for the installation of detectable warning surfaces as indicated by the following sections of the ADA Accessibility Guidelines (ADAAG).

**R304.1 General.** Detectable warnings shall consist of a surface of truncated domes aligned in a square or radial grid pattern and shall comply with R304.

**R304.1.1 Dome Size.** Truncated domes in a detectable warning surface shall have a base diameter of 23 mm (0.9 in) minimum to 36 mm (1.4 in) maximum; a top diameter of 50 percent of the base diameter minimum to 65 percent of the base diameter maximum; and a height of 5 mm (0.2 in) minimum.

**R304.1.2 Dome Spacing.** Truncated domes in a detectable warning surface shall have a center-to-center spacing of 41 mm (1.6 in) minimum and 67 mm (2.4 in) maximum; and a base-to-base spacing of 17 mm (0.65 in) minimum, measured between the most adjacent domes.

**R304.1.3 Contrast.** Detectable warning surfaces shall contrast visually with adjacent gutter, street or highway, or walkwaysurface, either light-on-dark or dark-on-light.

**R304.1.4 Size.** Detectable warning surfaces shall extend 610 mm (24 in) minimum in the direction of travel and the full width of the curb ramp (exclusive of flares), the landing, or the blended transition.

### R304.2 Location and Alignment

**R304.2.1 Perpendicular Curb Ramps.** Where both ends of the bottom grade break complying with R303.3.4 are 1.5 m (5.0 ft) or less from the back of curb, the detectable warning shall be located on the ramp surface at the bottom grade break. Where either end of the bottom grade break is more than 1.5 m (5.0 ft) from the back of curb, the detectable warning shall be located on the lower landing.

## UNDERSTANDING COMPLIANCE

R304.1.4 Curb Ramp and Size of Detectable Warning Area

- Full width of ramp excluding flares
- 24" minimum in the direction of travel

R304.2.1 Perpendicular Curb Ramps

R304.2.2 Landings and Blended Transitions

- Located on landing or blended transition at back of curb
- 36" in the direction of travel

## KNOWING THE LAW

**R304.2.2 Landings and Blended Transitions.** The detectable warning shall be located on the landing or blended transition at the back of curb.

**R304.2.3 Alignment.** The rows of truncated domes in a detectable warning surface shall be aligned to be perpendicular or radial to the grade-break between the ramp, landing, or blended transition and the street.

### California (CALTRANS)

Excerpts from the 2001 California Building Code, California Code of Regulations, Title 24, Part 2, Volume 1, California Building Standards Commission

**1102A.3-C Detectable warning.** Only approved DSA/AC detectable warning products and directional surfaces shall be installed as provided in the California Code of Regulations (CCR), Title 24, Part 1, Articles 2, 3, and 4.

**1117A.4.7 Detectable warnings.** A curb ramp shall have a detectable warning that extends the full width and depth of the curb ramp when the ramp slope is less than 1 unit vertical in 15 units horizontal (6.7% slope).

**1133B.8.3 Detectable warnings at transit boarding platforms.** Transit boarding platforms shall have a detectable warning texture extending the full length of the loading area.

**1138.8.4 Detectable directional texture at boarding platforms.** At transit boarding platforms, the pedestrian access shall be identified with a detectable directional texture.

R305.4 Medians and Pedestrian Refuge Islands

- Shall have detectable warnings that comply with R304 at ramps and blended transitions
- At cut-through islands at curb line, in-line with face of curb and shall be separated by a 2 foot minimum length of walkway without detectable warnings

R304.2.3 Rail Crossing

- Edge nearest rail crossing is 6 feet minimum and 15 feet maximum from center line of the nearest rail
- Truncated domes shall be aligned to be parallel with the direction of wheelchair travel

# intelligent design™ surface applied

ADA compliant dome geometry

Tile geometry allows for consistent dome spacing to be maintained between adjoining tiles.

Pre-formed fastener locations enable error-free installation. Color-matched Tek™ Anchor with stainless steel fastener is supplied with tile.

Perimeter of tile is designed to meet ADA requirements for surface height transition.

High density, diamond grip™ pyramid micro texture designed for exceptional slip resistance in wet and dry conditions.

Audible detectability technology engineered for sound amplification.

Maximized strength load transfer design, bosses located directly under domes transfer loads directly to substrate.

Textured surface to allow optimum adhesive bond.

Adhesive location identified on reverse side of tile for easy, error-free installation.

easy to install, easy to replace  
designed for more environmentally-conscious  
installation and replacement

**Access Tile**®

# INSTALLATION

- 1 Place the tile on the designated location and trace the perimeter with a thin permanent marker.
- 2 Set the tile aside and using a 4" diamond cup grinder, scour the concrete within the marked location and in correspondence with the location requiring adhesive as indicated in backside of tile.
- 3 Clear away the dust with a leaf blower then clean the back of the tile and the concrete with rag soaked in acetone.
- 4 Apply adhesive to back of tile (as indicated on tile). The first bead should be applied thin,  $\frac{1}{8}$ " from the perimeter edge and a second thicker bead applied 1" inside of the first.
- 5 Set the tile true and square to the curb ramp and press down firmly.
- 6 While stepping down on either side of pre-formed hole, drill down 3" into concrete slab using a hammer drill and the recommended  $\frac{1}{2}$ " diameter carbide drill bit.
- 7 While still applying pressure, remove the dust and any adhesive that surfaces and carefully set the supplied color-matched Tek™ Anchor with a plastic-tipped hammer. Repeat steps 6 & 7 while working across the tile from one end until all pre-formed fastener locations are completed.
- 8 Clean the perimeter of the tile and the immediately surrounding concrete with acetone making sure to remove any adhesive that has escaped from beneath the tile. Apply and smooth sealant around perimeter of tile.

TACTILE Bond & Seal

Minimum of 1 tube for 10ft<sup>2</sup>

Additional tube required to seal perimeter

Order additional tubes using Part # TBS-010

Low profile, chamfered perimeter edge for smooth transition from surrounding walking surface to tile surface.

*Engineered for ultimate performance and optimal cost-effectiveness.*

Wide-in-line dome configuration facilitates a smooth rolling transition for strollers, wheelchairs and walkers meeting federal and state standards.

High density, diamond grip™ pyramid micro texture designed for exceptional slip resistance in wet and dry conditions.

**Access Tile**

# SURFACE APPLIED

the most innovative retrofit system

Access Tile's Surface Applied tile is engineered to successfully upgrade any existing surface to comply with Federally mandated detectable warning requirements.

## ADA COMPLIANCE

[www.accesstile.com/ada-compliance](http://www.accesstile.com/ada-compliance)

- 2.35" center-to-center, in-line dome spacing meets ADA Federal and State requirements
- Truncated dome size and spacing compliant with ADA Federal and State requirements, 0.9" base and 0.45" top diameter
- Fully complies with all ADA and DHSA requirements for surface height transitions to eliminate trip hazards
- Consistent dome spacing when tiles are adjoined [side-by-side or end-to-end]
- Wide in-line dome configuration facilitates a smooth rolling transition for strollers, wheelchairs and walkers

## ASTM & UL TESTING

[www.accesstile.com/specifications](http://www.accesstile.com/specifications)

- Tensile Strength ASTM D438
- Flexural Strength ASTM D790
- Compressive Strength ASTM D696
- Accelerated Weathering ASTM G155
- Slip Resistance ASTM C1028
- Flame Spread Index ASTM E84
- Accelerated Aging (freeze/thaw) D1029
- Linear Thermal Expansion ASTM D696-02
- Tile Bond Strength ASTM C1083

## PRODUCT SIZES\*

## INTELLIGENT DESIGN FEATURES

- Audible detectability technology engineered for sound amplification
- Engineered load transfer design with bosses located directly under domes transfer loads directly to substrate
- Bevelled perimeter edge meets ADA vertical displacement requirements
- Strategically placed pre-formed fastener hole locations enhance installation integrity and provide easy installation
- Tiles shipped with color-matched fasteners
- Adhesive location identified on reverse side of tile for easy, error-free installation
- Tactile Bond&Seal is available through all our authorized distributors. The system is designed and tested to be both a structural adhesive and perimeter edge sealant.
- Interactive sizes - all tiles maintain pattern repeat when mounted side-to-side or top-to-bottom

## STANDARD COLORS

## PHYSICAL CHARACTERISTICS

ASTM Reference	Test Description	Test Results
ASTM D 695	Compressive Strength	26,900
ASTM D 790	Flexural Strength	31,300
ASTM D 570	Water Absorption	0.05%
ASTM C 1028	Slip Resistance	1.18 Dry / 0.88 wet
ASTM E 84	Flame Spread Index	≤25
ASTM B 117	Salt Spray	No Change (300 hours)
ASTM 1308	Chemical Stain	No Effect
ASTM C 501	Abrasion Resistance	Iw >500
ASTM G 155	Accelerated Weathering	Delta E <5 (2,000 hours)
ASTM D 638	Tensile Strength	12,800 psi
AASHTO-H20	Load Bearing at 10,410 lbs.	No Cracking, Delamination or Deformation
ASTM C 1026	Freeze/Thaw/Heat	No Chipping, Cracking or Peeling
ASTM D 1037	Accelerated Aging (Freeze/Thaw)	No Change in Color, Gloss or Delamination
ASTM D 696-03	Linear Thermal Expansion	$9.45 \times 10^{-7}$ per °Fahrenheit
RCRA-C	Non-Hazardous Classification	Non-Hazardous

Products listed in this catalog represent typical average values determined in accordance with accepted test methods. The data is subject to normal manufacturing and testing variations, and subject to change without notice. Specifications, see [www.accesstile.com](http://www.accesstile.com)
